

Lalit Dubey

Full Stack .NET Developer

lalitdubey8626@gmail.com | +91 9455648626 | Bhadohi, UP | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack .NET Developer with hands-on experience building scalable web applications using ASP.NET Core MVC, Web API, C#, ADO.NET, Dapper, and SQL Server. Built and deployed projects covering role-based task management with AI integration, secure authentication, and a full e-commerce platform with server-side image optimization. Completed internship at Techpile Technology Pvt. Ltd., Lucknow. Passionate about clean architecture, database optimization, and delivering full-cycle software solutions.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, jQuery, Ajax, Bootstrap
- **Backend:** C#, .NET Core MVC, .NET Core Web API, ASP.NET Framework, ADO.NET, Dapper ORM
- **Database:** MSSQL, MySQL, Stored Procedures, Indexing, CRUD Operations
- **Tools:** Git, GitHub, Swagger, Postman, Visual Studio 2022, SixLabors.ImageSharp

PROFESSIONAL EXPERIENCE

Full Stack .NET Intern | Techpile Technology Pvt. Ltd., Lucknow 2024 – 2025

- Developed real-world web applications using ASP.NET Core MVC, C#, and ADO.NET with MSSQL stored procedures.
- Integrated jQuery & AJAX for asynchronous UI interactions, reducing full page reloads and improving user experience.
- Refactored DBLayer using Scoped Dependency Injection (DI) pattern, improving application maintainability and reducing memory overhead.

Summer Trainee — .NET Developer | Techpile Technology Pvt. Ltd., Lucknow 2023

- Built a full-stack Event Management System using ASP.NET MVC, ADO.NET, stored procedures, and a complete DB schema.

KEY PROJECTS

Task Management System

[GitHub](#) | [Live](#)

ASP.NET Core · C# · MSSQL · Stored Procedures · Role-Based Authentication · AI Integration

- Role-based task management app with separate admin and user dashboards, including full project, task, and user CRUD.
- Secure cookie/session-based authentication with role-based access control, restricting admin and user features to their respective roles.
- OTP email verification via SMTP for forgot/reset password flow, with OTP verification before allowing a new password to be set.
- Integrated an AI-powered feature into the task workflow, extending the app beyond standard CRUD operations.
- Task and project comment threads letting admins and users view all tasks and discussions of a project in one click.
- Users can view assigned tasks, update task status inline via dropdown, and edit their own profile information.
- MSSQL queries optimized with stored procedures; deployed live on ASP.NET hosting.

Naxora — E-Commerce Platform

[GitHub](#) | [Live](#)

ASP.NET Core MVC · C# · ADO.NET · MSSQL · Stored Procedures · SixLabors.ImageSharp · Role-Based Authentication · jQuery/AJAX

- Built and deployed a full-stack e-commerce app with dynamic catalog filtering across nested categories/subcategories and an interactive cart flow.
- Implemented role-based access separating shopper and admin areas, with user registration, login, and profile management.
- Built an admin dashboard for inventory, listing, and stock control, with modular jQuery/AJAX scripts for category and subcategory management.
- Implemented a server-side image pipeline with **SixLabors.ImageSharp** to resize and compress product uploads before disk storage, keeping page payloads minimal.
- Built an offline pincode lookup by storing **165,000+** records in MSSQL after the external API went down, so address auto-fill works even during outages.
- Designed a DbLayer with ADO.NET, parameterized queries and stored procedures over a normalized MSSQL schema.

EDUCATION

Diploma in Computer Science and Engineering — Government Polytechnic Chopan, Sonbhadra 2021 – 2024

Intermediate (10+2) — Shri Mata Prasad Dubey Inter College, Bhadohi 2019 – 2021

High School (10th) — Shri Mata Prasad Dubey Inter College, Bhadohi 2018 – 2019
