PROFESSIONAL EXPERIENCE

- Full Stack .NET Intern | Techpile Technology Pvt. Ltd., Lucknow** 2024 – 2025
- Developed real-world web applications using ASP.NET Core MVC, C#, and ADO.NET with MSSQL stored procedures.
 - Integrated jQuery & AJAX for asynchronous UI interactions, reducing full page reloads and improving user experience.
 - Refactored DBLayer using Scoped Dependency Injection (DI) pattern, improving application maintainability and reducing memory overhead.
- Summer Trainee — .NET Developer | Techpile Technology Pvt. Ltd., Lucknow** 2023
- Built a full-stack Event Management System using ASP.NET MVC, ADO.NET, stored procedures, and a complete DB schema.

KEY PROJECTS

Task Management System

[GitHub](#)

ASP.NET Core · C# · MSSQL · Stored Procedures · Role-Based Authentication

- Role-based task management app with separate admin and user dashboards, including full project, task, and user CRUD.
- Secure cookie/session-based authentication with role-based access control and OTP email verification (SMTP) for password reset.
- Task and project comment threads, inline task status updates via dropdown, and MSSQL queries optimized with stored procedures.

SignUp & Login System

[GitHub](#)

ASP.NET Core MVC · C# · MSSQL · BCrypt · jQuery/AJAX · Gmail SMTP

- Integrated BCrypt hashing, OTP email verification via Gmail SMTP, forgot/reset password, and profile image upload.
- AJAX-driven form submissions with server-side validation and real-time user feedback.
- Engineered an offline address auto-fill mechanism by scripting and caching 165k+ pincode records in MSSQL, bypassing external API downtime and exposing custom REST endpoints for zero-latency lookup.

ASP.NET Core Web API

[GitHub](#)

ASP.NET Core Web API · Dapper · MSSQL · Swagger

- Designed RESTful APIs using Dapper ORM and implemented a unified APIResponse wrapper pattern for consistent error handling and client integration.

AI-Powered Resume Enhancer

[GitHub](#)

ASP.NET Core MVC · Groq API · PdfPig · DocX

- Integrated Groq LLM API with PdfPig to parse PDF resumes, extract structural data, and generate optimized content in real-time.
- Automated document generation workflow converting LLM response into styled .docx files using DocX library.
